INTEGRATED SOLUTIONS | OUR PHARMACEUTICAL APPROACH

'Meeting your pharmaceutical industry challenges'

We understand that the pharmaceutical industry brings its own set of challenges. When it comes to freight solutions, you need a fast, reliable partner with a commitment to Good Distribution Practice who will work for you – around the clock – to provide integrated door-

to-door delivery every day of the year. A partner who creates transparent, tailored solutions and who speaks your language through clear communication channels.

A partner like Geodis Wilson.

Geodis Wilson, your freight management partner

Tailored solutions to ensure pharmaceutical compliance

The challenges of pharmaceutical logistics

If you are going to outsource non-core business like freight management, then you want to know that it is going to be done right. Your industry is facing enormous pressure to reduce global logistics costs. At the same time, increased outsourcing to countries such as India and China means that total supply chain control is now at the forefront of many business strategies. We have a proven pharmaceutical track record. We also have a background of partnering with companies in other leading areas – including automotive and retail – to meet industry-specific challenges and reduce costs by optimizing the supply chain. You will receive a personalized solution that will give you the time you need to focus on your business.

Global Control Tower and e-service transparency

Freight management is all about maintaining full control at all stages, everywhere. Our Global Control Tower approach provides complete operational, tactical and strategic control throughout the supply chain. We provide fully centralized logistic development, dispatch administration and operational handling, and our e-services allow full transparency like never before. Freight Planner, Freight Monitor and a customized portal provide booking services and proactive quality control, as well as the real-time tracking and tracing that is so valuable for cold chain shipping and the transportation of envirotainers. Best of all, a single point of contact – the Global Control Tower – provides one-stop shopping and global pricing with a simple rate structure, no matter where your business is located. Full control. Every step of the way.

Teams dedicated to your industry

Geodis Wilson is strategically located across the world with teams committed and dedicated to the pharmaceutical industry. We monitor changes in regulatory EMEA and FDA standards. Our superior account management and strong network can match the needs of even the largest global companies. We also take full responsibility from start to finish. You will always have a direct line to somebody who knows the pharmaceutical business – and who knows what is going on.

A total pharmaceutical solution tailored to your needs

Good Distribution Practice is at the core of any pharmaceutical logistics solution. We provide the most optimal sea, air or land route throughout the entire supply chain to provide the best cost/quality ratio for your business. We are experts in raw material management and just-in-time solutions, as well as pharmaceutical packing, export services and temperature-controlled stock management. Not only will you receive services tailored to your specific requirements, but we will also use our Cost Analysis Tool to highlight potential process improvements throughout your supply chain, which can lower your overall costs considerably. It is a continuously customized solution tailored to your increasingly regulated industry, from a partner who understands the challenges you face.

At Geodis Wilson, we think that is what partnership is all about.

Introducing Geodis Wilson

Geodis Wilson makes customers more competitive by delivering their cargo across five continents by sea and air and by making their supply chain transparent and easy to manage.
